

Flatpack Multi Tool

Tool Features:

- 2,3,4,5 and 8mm Hex Keys
- Chain Tool 8,9,10,11 & 12 speed
- Chain Connecting Link storage compartment
- Chain hook to hold chain ends prior to connection
- 13/14/15/16G & Spoke Tools
- Phillips and Flathead Screwdrivers
- T25 Torx key
- 2x Integrated Tyre Levers
- The above tools are chrome vanadium (Cr-V) except the tyre levers. The chain tool handle is aluminium.

Chain Tool:

- This tool is for the installation of a new chain pin or rivet for trail or roadside repair and is not intended for workshop use.
- Before riding, ensure that the repaired chain runs on each of the gears without jumping or skipping.
- NB: This is not a peening tool and therefore not suitable for the installation of a Campagnolo chain rivet.
- The chain tool can be removed from the plastic tool body for ease of use.
- NB: Chain tool also has a removable aluminium handle to facilitate the use of the chain tool body as a spoke key (removing the handle allows the 360 degree rotation required).
-

Tyre Levers:

- The tyre levers are for occasional roadside and trailside use only and are not intended to replace workshop quality tools.

Troubleshooting:

- If you encounter mechanical difficulties, it is recommended that a suitably certified professional bike mechanic is consulted for assistance.
